## STUDENT INFORMATION

---

Student Name: Chentao Li  
Gender: M  
Program: Cancer Biology and Cancer Immunotherapies Online Research Seminar  
Start Date: January 15, 2022  
End Date: February 26, 2022

## GRADE

---

Participation	Assignment	Final Project	Total Grade
A	A	A	A

## PROGRAM INFORMATION

---

Methods and tools: To achieve such a goal, it requires a detailed understanding of basic concepts of cancer biology and immunology. Specifically, this course will provide lectures based on the current literature on the following topics: 1. Basics about the immune system and cancer biology, 2. The interplay between the immune system and cancer cells and how it contributes to tumor development and metastasis, 3. Available Current Immunotherapies, and 4. A roadmap for the next decade in cancer research and future perspectives. During the classes, we will discuss in details these basic concepts based on available literature and on-line tools. We will also review the literature in a constructive way to understand the rationale behind the research done and to identify the gaps in the so far available data
